

ABSTRACT OF THE DISCLOSURE

**APPARATUS AND METHOD OF DIAGNOSING NETWORK PROTOCOL ERRORS
USING XML DOCUMENTS**

5

10 A method, system and apparatus for diagnosing network
protocol errors using an XML document are provided. Data
packet exchanges are captured and used to generate an XML
document. In one embodiment, the XML document is passed
through parser to diagnose the errors. In another
embodiment, the network protocol errors are diagnosed by
visually inspecting the XML document.
